**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

**1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:**

**A person shall be entitled to a patent unless –**

**(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.**

**2. Claims 19-27 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bachmann or Horn, of record.**

**Patentees disclose a device containing a feeding means containing scrapers positioned between the outer radius of the feeding means and the inner surface of the hollow body to remove the material sticking to the inner surface of the hollow body. The preamble reciting intended use is given little weight. The scrapers positioned in the device of the references would inherently have the same scraping ability as called for in the instant claims.**

**It has been held that where applicant claims a composition in terms of function, property or characteristic where said function is not explicitly shown by the reference and where the examiner has explained why the function, property or characteristic is considered inherent in the prior art, it is appropriate for the examiner to make a rejection under both the applicable section of 35 USC and 35 USC 103 such that the burden is placed upon the applicant to provide clear evidence that the respective compositions do in fact differ. *In re Best*, 195 USPQ 430,433 (CCPA 1977), *In re Fitzgerald et al.*, 205 USPQ 594.**

**Any inquiry concerning this communication or earlier communications from the examiner should be directed to Morton Foelak whose telephone number is (571) 272-1071. The examiner can normally be reached on Monday thru Friday.**
